

Human Behavior Peer presentation

1. Pair up with someone in class to look at their rough-cut of the video assignment.
2. Together, discuss the source video and how it is being altered.
3. Some questions to considering for discussion could include:
 - What is the original human behavior?
 - What is the main type of manipulation?
 - Is the manipulation obvious or subtle?
 - What does the manipulation reveal about the human activity? How does it relate?
 - Does the manipulation go far enough? Does it go too far?
 - Is there a 2nd type of manipulation? subtle or obvious?
 - Does the piece have transitions at the beginning or end? Does it fade in or fade out?
 - What is the most interesting (or surprising) aspect of the rough piece?
 - What is the most boring aspect of the piece?
 - What is finished?
 - What needs to have more attention or be done better?
 - How long will it take to complete? How long will it take to render?
